EDUCATION

THE GRACE HOPPER PROGRAM

July 2022

Software Engineering Immersive
Fullstack Academy

NYC COLLEGE OF TECHNOLOGY

December 2018

B.S. Radiological Science
magna cum laude

PROFESSIONAL DEVELOPMENT

LANGUAGES

JavaScript

HTML5

CSS3

Python

LIBRARIES / FRAMEWORKS

Node.js / Express

React / React Native

Redux

PostgreSQL

Sequelize

Firebase

Tailwind

Bootstrap

Expo

TOOLS

Git / GitHub

Miro

PROFESSIONAL SUMMARY

Highly motivated Grace Hopper Program graduate, experienced in full stack application development. Seeking an entry-level software engineering role in a company that values diversity, inclusivity, and opportunities for learning and growth.

PROJECTS

Nifty Gallery - Full Stack Developer

Mar 2023

NFT Gallery for users to view collections when submitting an Ethereum contract address - ([GitHub](#))

- Created a web app using **React** and **Node.js** with **Express** and incorporated **Bootstrap** styling
- Leveraged **Moralis's** NFT API to fetch a collection of NFTs on the Ethereum blockchain and related metadata upon submitting a contract address
- Implemented a clean, user-friendly UI using **Bootstrap** that displays the collection as a grid of cards and a modal to view more details

Tomato - Full Stack Developer

July 2022

Social media platform that allows users to interact with each other based on their physical proximity - ([GitHub](#), [YouTube](#))

- Designed and built a map-based social media mobile app using **React Native**, featuring **Google Maps API** integration to display nearby happenings posted by users.
- Utilized **Firebase's** noSQL database for efficient user authentication, data management and necessary queries for a complete friend request system
- Deployed a front end UI for profile settings and friends component

Pet Play - Full Stack Developer

June 2022

E-commerce platform specializing in selling pet goods to devoted animal lovers - ([GitHub](#))

- Collaborated to develop a **Node.js** e-commerce web app that provides a seamless user experience for guests, registered customers, and sellers
- Integrated **React** with **Redux** to efficiently manage and maintain user cart and inventory states
- Employed **PostgreSQL** and **Sequelize** to facilitate basic CRUD (create, read, update, delete) operations for user carts and inventory

WORK EXPERIENCE

X-Ray Technologist - (Mammography)

Sept 2017 - Aug 2021

NYU Langone Health

- Delivered comprehensive training programs on new workflows following software updates
- Managed and motivated a team of 5-7 technologists to complete daily tasks with a high level of efficiency and timeliness
- Significantly reduced turnaround times by implementing new processes, leading to achievement of departmental KPI goal in responding to 80% of emergencies within 15 minutes
- Established strong rapport with 30 patients daily through effective and empathetic communication, resulting in a high level of trust and understanding of procedures
